Keanu Lagundimao

Honolulu, HI | (808) 369-6086 | lagundimaokeanu@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Full-Stack Software Engineer with experience building responsive web applications and maintaining production websites. Skilled in JavaScript, TypeScript, React, Next.js, Node.js, REST APIs, SQL, and modern databases, with an emphasis on thoughtful product design and reliable implementation. Experienced in collaborating with technical and creative teams to ideate concepts and transform it into polished digital products.

Skills

- **Languages**: JavaScript, TypeScript, Python, SQL
- **Frontend**: React, Next.js, HTML/CSS, Tailwind CSS, Responsive Design
- **Backend**: Node.js, Express, REST APIs, WebSockets
- **Databases**: PostgreSQL, MongoDB
- **Tools**: Git, GitHub, Docker, Vercel/Netlify, Software Testing

Projects

Budget Visualization Web App – *React, Next.js, PostgreSQL, TypeScript, Chart.js, Vercel*

- Developed a full-stack budgeting application with React and Next.js to calculate and visualize expenses, savings, and spending patterns from user-provided data.
- Designed a relational PostgreSQL database schema and implemented a CRUD API with custom authentication using Next.js. • Built dynamic React and Chart.js visualizations for key budgeting metrics, including monthly and yearly expenses/savings, and spending distributions.

Anonymous Real-Time Messaging Platform – *Next.js, PostgreSQL, Docker, WebSockets*

- Implemented 24-hour TTL-based room expiration with automated cleanup of associated messages and PostgreSQL data, supporting reliable real-time messaging.
- Implemented anonymous authentication with HTTP-only session cookies, supporting room-level admin privileges and protected message CRUD operations.

Full-Stack Student Matching Platform – *React, Meteor, MongoDB*

- Developed a platform that allows students to create study sessions and network with classmates, implementing features for users to add/drop classes, find classmates, manage profiles, create study sessions, and communicate through message boards, along with admin functionality.
- Collaborated within a shared codebase, prioritizing decisions based on technical bottlenecks and feature dependencies, organizing development with iterative milestones.

AAPL Market Data Analysis – *Python, NumPy, Matplotlib, Scikit-learn*

- Analyzed historical AAPL market data to identify relationships between technical indicators and stock-price movements.
- Cleaned, transformed, and normalized historical market data, implementing technical indicators as features for model training.
- Trained and evaluated linear and multiple linear regression models to identify technical indicators most strongly associated with stock price movements.

Work Experience

Pono Entertainment – *Freelance Developer*

Oct 2023 - Jun 2024

- Designed and developed a 3D, mobile-responsive CMS website for idol group Crossing Rain using Webflow, Figma, and Blender, applying responsive design principles across device sizes.
- Managed website maintenance, feature updates, and software testing across multiple Pono Entertainment websites.
- Collaborated with idol members and team members to develop a unified concept that aligned creative visions with the brand.

Doraku Izakaya & Sushi – *Sushi Chef, Server, Busser, Food Runner*

May 2020 - Present

- Earned Employee of the Month three times within two years for exceptional reliability and consistently leading by example.
- Covered critical responsibilities across multiple roles during peak service periods and trained over a dozen employees.

Education

University of Hawaii at Mānoa *B.A. in Information & Computer Science*

May 2025

• **Coursework:** Data Structures & Algorithms, Software Engineering, Statistics, Machine Learning, Big Data Analysis, Database Systems
