Skills & Technologies

Languages: JavaScript, TypeScript, Python, SQL
Frontend: React, Next.js, HTML/CSS, Tailwind CSS
Backend: Node.js, Express, REST APIs, WebSockets
Databases: PostgreSQL, MongoDB
Tools: Git, GitHub, Docker, Vercel/Netlify

Projects & Technical Experience

Budget Visualization Web App – React, Next.js, PostgreSQL, TypeScript, Chart.js, Vercel

Developed a full-stack budgeting application to calculate and visualize expenses, savings, and spending patterns from user-provided data. Designed a relational database schema, API with CRUD operations, and custom authentication using Next.js.

Built dynamic React and Chart.js visualizations for key budgeting metrics, including monthly and yearly expenses/savings, and spending distributions.

Anonymous Real-Time Messaging Platform – Next.js, PostgreSQL, Docker, WebSockets

Implemented 24-hour TTL-based room expiration with automated cleanup of associated messages and data with PostgreSQL. Implemented anonymous authentication with HTTP-only session cookies, supporting room-level admin privileges and protected message CRUD operations.

Full-Stack Student Matching Platform – React, Meteor, MongoDB

Developed a platform that allows students to create study sessions and network with classmates, implementing features for users to add/drop classes, find classmates, manage profiles, create study sessions, and communicate through message boards, along with admin functionality.

Collaborated within a shared codebase, prioritizing decisions based on technical bottlenecks and feature dependencies, organizing development with iterative milestones.

AAPL Market Data Analysis – Python, NumPy, Matplotlib, Scikit-learn

Analyzed historical AAPL market data to identify relationships between technical indicators and stock-price movements. Cleaned, transformed, and normalized historical market data, implementing technical indicators as features for model training.

Trained and evaluated linear and multiple linear regression models to identify technical indicators most strongly associated with stock price movements.

Work Experience

Pono Entertainment – Freelance Developer *Oct 2023 – June 2024*

Designed and developed a 3D, mobile-responsive CMS website for idol group Crossing Rain using Webflow, Figma, and Blender. Managed website maintenance and feature updates across multiple Pono Entertainment websites.

Collaborated with idol members and team members to develop a concept that unified creative visions and aligned with their brand.

Doraku Izakaya & Sushi – Sushi Chef, Server, Busser, Food Runner *May 2020 – Present*

Earned Employee of the Month 3 times within the past two years for exceptional reliability, consistently leading by example and covering critical responsibilities during peak service periods. Trained over a dozen employees in multiple roles.

Education

University of Hawaii at Mānoa — B.A. in Information & Computer Science *May 2025*

Coursework: Data Structures & Algorithms, Software Engineering, Statistics, Machine Learning, Big Data Analysis, Database Systems
