

Skills & Technologies

Languages: JavaScript, TypeScript, Python, SQL
Frontend: React, Next.js, HTML/CSS, Tailwind CSS
Backend: Node.js, Express, REST APIs
Databases: PostgreSQL, MongoDB
DevOps & Tools: GitHub, Docker, Claude Code

Work Experience

Pono Entertainment – Freelance Developer *Oct 2023 – June 2024*

Designed and developed a 3D, mobile-responsive CMS website for idol group Crossing Rain using Webflow, Figma, and Blender.

Collaborated with idol members and team members to develop a concept that unified creative visions and aligned with their brand.

Managed website maintenance and feature updates across multiple Pono Entertainment websites.

Doraku Izakaya & Sushi – Sushi Chef, Server, Busser, Food Runner *Mar 2020 – Present*

Earned Employee of the Month 3 times within the past two years for exceptional reliability, always covering critical responsibilities and roles during call-outs and peak service periods.

Identified service bottlenecks and implemented improvements to prep workflow that reduced ticket times by up to 50% during peak service while keeping decision-making complexity minimal.

Trained and mentored new team members through hands-on guidance while coordinating closely with front-of-house and kitchen staff to maintain quality standards.

Projects & Technical Experience

Budget Visualization Web App – React, Next.js, PostgreSQL, TypeScript, Chart.js, Vercel

Developed a full-stack budgeting application to calculate and visualize from user-provided data. Designed a relational database schema, API with CRUD operations, and custom authentication using Next.js.

Built dynamic React and Chart.js visualizations for key budgeting metrics, including monthly and yearly expenses/savings, and spending distributions.

Distributed Real-Time Messaging Platform – Next.js, PostgreSQL, Docker

Implemented 24-hour TTL-based room expiration with automated cleanup of associated messages and data with PostgreSQL.

Applied Agile development practices through iterative sprints, backlogging, and incremental deliveries.

AAPL Market Data Analysis – Python, NumPy, Matplotlib, Scikit-learn

Cleaned, transformed, and normalized historical AAPL market data, engineering technical indicators as features for model training.

Trained and evaluated linear and multiple linear regression models to identify technical indicators most strongly associated with stock price movements.

Education

University of Hawaii at Mānoa – B.A. in Information & Computer Science, Data Analytics *May 2025*
